- \* Applicant argued (1) that, "no motivation or suggestion exists to combine Hendrickson and Ferro." (page 4, 2nd paragraph).
- (1) In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See In re Fine, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988)and In re Jones, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, Ferro teaches the moving datasets from source to target, that is, data is moved from one location to anothe from within a virtual storage access and its associated structures (Ferro col. 2, lines 45-60); and he also teaches a dataset permits accessing data sets efficiently in a single or multiple CPU environment (Ferro col. 4, lines 40-52).
- \* Applicant argued (2) that, "the combination of Hendrick and Ferro fails to teach or suggest all of the claim limitations of independent claims 1, 12, 23, 24 and 26." (page 4, last paragraph).
- (2) Ferro, Jr. et al. (US 4,855,907) (herein Ferro) teaches a method for moving individual base clusters of VSAM from a source to a target DASD volume while maintaining the integrity of the data set and its associated structures (col. 1, lines 10-14); also Ferro teaches how to distingish between the source and target data sets ((col. 2, lines 54-59). Thus, applicant's argument are not persuasive.
